

## FIRE AND HEAT SAFETY GOGGLES

### 803 FIRE FIGHTER

The Fire Fighter has been designed for maximum comfort in extreme heat conditions and fire environments.

The Fire Fighter is constructed using comfort padding to ensure your eyes are protected from stray particles. The comfort pads are contoured around each eye, giving you maximum protection.

The goggle is ideal in any high temperature work environment, including fire fighting, furnace works, smelting, fire break burnoff, and so forth.

The goggle is equipped with a controlled ventilation system.

The low profile design is great for wearing under helmets.

803SHBCA	Black	Clear Anti-Fog

### 109 FRONTLINE FIRE

The 109 Frontline goggle is certified for high temperature work and fire protection.

The soft frame construction is ideal to use in elevated temperature areas, as experienced in fire fighting conditions. Other applications include furnace and smelter environments where radiant heat is a key concern.

The Frontline can also be used as an everyday medium impact industrial safety goggle.

The Frontline has been designed with a swivel band, allowing you to adjust the straps to suit your needs. This goggle can be worn over spectacles.

The soft padding ensure you remain comfortable during your work.
