

# Pacific QUADSAFE Complies NZS8600

Optional neck flap and visor shown above

Pacific have developed a stylish lightweight multi-size helmet which complies with the new NZS8600 Standard. Accessories including face shields (for chain sawing), helmet lights and ear protection can be added Pacific **QUADSAFE** is designed for off-road use by ATV users at low speeds (generally under 30kph). Although a helmet will not guarantee safety from head injury in all cases, injury may be reduced through the appropriate use of ATVs and wearing a helmet in many cases. As head injuries may occur in any setting where an ATV is in use the helmet should be worn (fitted correctly and chinstrap fastened) at all times when riding ATVs.

The PACIFIC **QUADSAFE** is a lightweight multi-size helmet with ratchet harness size adjuster. The ratchet adjuster fits sizes 52cm-64cm so that almost every user can share the same helmet. Because the helmet will invariably stay on the bike day and night, it is designed to resist UV radiation.
