Kestrel Pocket Weather Meters offer fast accurate readings, are easy to use, and are small, lightweight, waterproof and tough!

COMPUTER INTERFACE WITH SOFTWARE: The KESTREL interface is the ideal companion for the Kestrel 4000 Pocket Weather Meter. The optional computer interface data can be uploaded for long-term storage, in-depth analysis and detailed charting. Simply connect the interface cable to the serial port on your PC, rest the Kestrel 4000 on the cradle and upload your stored data. The software is easy to use and saves the data in a comma delimited text file for use in your choice of application: text editor, spreadsheet or database.

KESTREL ACCESSORIES: Accucase moulded to fit the Kestrel 4000. This ballistic weave nylon and firm closed-cell foam case features a side zipper for easy access to your Kestrel. The accucase plastic clip allows you to attach your Kestrel to your belt or pack strap. Readings can still be taken while your Kestrel is in the accucase. Listed below are just some of the accessories available. From left to right is the replacement impeller, impeller cover, Kestrel carry bag, Kestrel stability mount, lanyard, USB Computer Interface cable and Kestrel cover.
