

# Argus™ 4 LITE

## Argus™ 4 LITE Designed for your budget!

The Argus™4 LITE range of thermal imaging cameras are a low cost, high quality solution to meet the needs of every firefighter. The Argus™4 LITE uses the same highly successful Amorphous Silicon (ASi) Microbolometer Detector as used in the standard Argus™4 and allows the end-user to customise their camera with features they want. The Argus™4 LITE cameras are compatible with all Argus4 optional accessories with the exception of the external power and video adaptor.

### FEATURES

- Tri-Mode sensitivity for increased temperature range performance
- Colour battery level indicator and user replaceable external fittings

### STANDARD ACCESSORIES

- Soft carry bag
- Side straps
- One rechargeable battery
- AC or DC battery charger
- Operating instructions

### OPTIONAL FEATURES

The Argus™4 Lite can be supplied with the same advanced features available on the standard Argus™4.

These features include:

- Dynamic Scene Colourisation (DSC) – Colourises the thermal image to allow the fire fighter to pinpoint the hottest areas within the fire scene and is set up by the use of a supplied remote control.
- Direct Temperature Measurements (DTM) – Displays both the temperature of objects within a defined area of the thermal scene and also the ambient temperature of the environment using a sensor mounted on the front of the camera.

These features can be supplied with the camera at time of purchase or added as an after sales upgrade.

### WARRANTY:

- The camera is supplied with a 2 year warranty as standard
- Warranty can be extended for up to three years at time of purchase
