

POK offers a wide range of water / foam medium expansion tube with a durable, lightweight constant gallonage nozzle with flow reach up to 100 + feet with an expansion ration of 70. Made out of high-grade aluminum alloy with the trademarked NITUFF™ finish that gives 50 microns of PTFE impregnated anodized with and a aluminum tube in a red epoxy finish. Any hose line can benefit from these tubes and increase their performance and reach with water or with a foam solution that has become a necessity for many professional firefighters who are faced with higher risk.
