

WILDLAND VALVES & WYES

Hardcoat Anodized Aluminum and PTFE

The valves, wyes and ball valves are made primarily of aluminum alloy in a heat-treated, fire engine red finish. The other major components are made of stainless steel and galvanized brass. Some of the major characteristics of these ball valves include: an anti-freezing assembly, the visual indicators for "open" and "close", friction loss reduced by up to three times, and a light weight and smaller design.
