

The Wildland nozzles offer a durable, lightweight constant or selectable gallonage nozzle with the features that you are looking for. Machined out of high-grade aluminum alloy with the trademarked NITUFF™ finish that gives 50 microns of PTFE impregnated anodized unlike the 20 microns of standard anodized. The standard shutoff ball is also coated using the NITUFF process, which provides years of smooth action with minimal wear.

The ROBATFLAM and WILDLAND single grip offer flow ranges from 5, 10, 15, 20, 25, 30, 32, 37, 40 or 60 @ 100 PSI in a 1.0" and 1.5" size. The TURBOLITE is a selectable gallonage nozzle and has an unique die cast aluminum body for lighter weight and durability and available in a 1.0" or 1.5" inlet. A built in stream shaper/strainer is also available on every model. Large bumper guard allows for easy change from straight stream to narrow fog to wide-angle fog to flush without having to shutdown. Customizing with color-coded bumper, pistol grip and shutoff handle as well as type of teeth available on some styles. Comes standard with a black bumper guard and black pistol grip. All Wildland nozzles are available in tip only configuration or without pistol grip.
