**3-1 Reduction Drive**  
Hose Reel

**Heavy Duty High Capacity**  
Hose Reel

**Underslung Hose Reel**  
mounted on a fire truck

## FIRE FIGHTING VEHICLE MOUNTED MODULES

### Quik Attack®

As with all our products, Quik Corp® Fire Fighting Modules offer the highest level of versatility and customisation to our customers. All units are fabricated in aluminium to the highest possible standards and designed to be mounted on a range of vehicles.

- > Various designs custom built to suit your needs
- > Choice of pumping configurations
- > High Volume/Low Pressure
- > Low Volume/Medium Pressure
- > Choice of diesel or petrol motor
- > Choice of hose reel from our comprehensive range
- > Choice of tank size, construction and baffling. Polyethylene or aluminium.
- > Choice of lockers and other custom designed accessories
- > Choice of powder coated colours

### Multi-Pump System

The revolutionary machine that combines two fire fighting units in one!

- One Power Source, Two Pumps**
- > Volume Application or Pressure Application

- Option to Conserve Water**
- > High Pressure/Low Volume pump uses much less water
- > This option is effective on 80% of fires
- > Enables fire fighters to remain on the fire ground longer
- > Facilitates better use of resources (water, truck and personnel)
- > Increases efficiency and effectiveness of fire fighters

### Versatile Modular Construction

### Different Hose Reel options and Pump Combinations

- Simple 1, 2, 3 Step Operation**
- > Start Motor - Select Pump - Open Nozzle/Squirt Water

### Lightweight Aluminium Construction

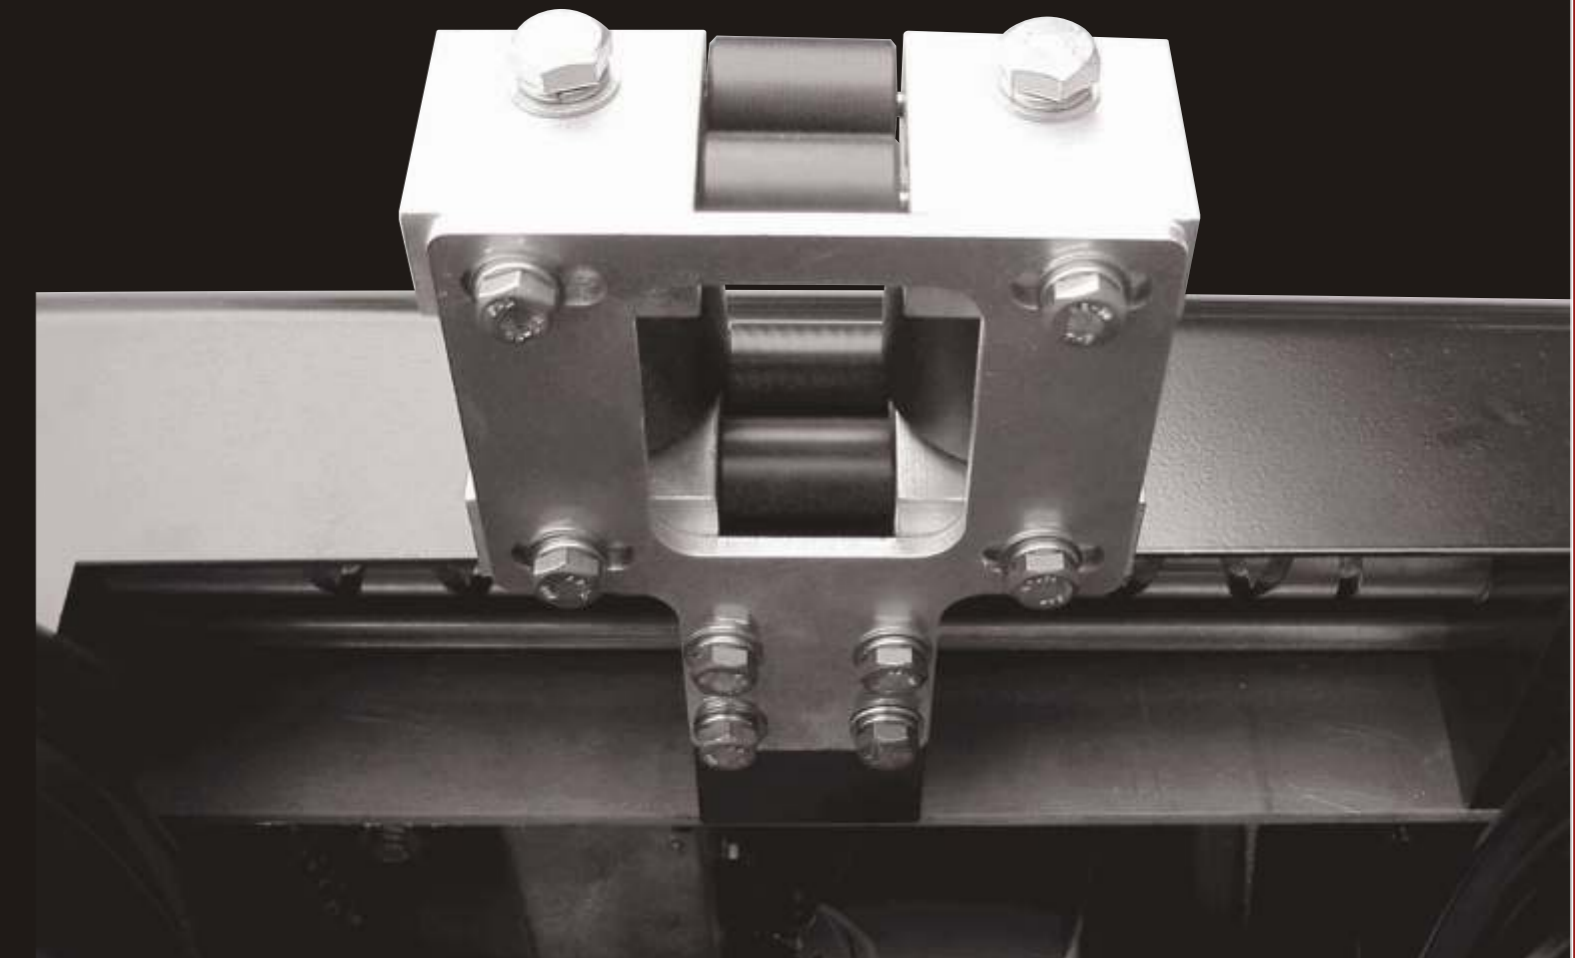

**Australian Designed, Australian Made and Australian Patented**

### INTENDED FOR:

- ✓ Bush Fire Fighting and Mop Up
- ✓ Quik Attack® Fire Fighting
- ✓ Hazardous Substance Containment
- ✓ Low Set Structural Fire Fighting
- ✓ Road Crash Rescue Support Vehicle

**QUIK CORP®**  
THE REEL EXPERTS

# Here's why Quik Corp® are... **The Reel Experts**

## AUSTRALIAN DESIGNED, CONSTRUCTED AND TESTED

Quik Corp® reels are designed in conjunction with Australian fire fighters to ensure each reel has the features that were most desirable for this critical job. All Quik Corp's hose reels are constructed and assembled on-site by our highly trained staff. Hose reel construction is performed to industry standards and each unit is rigorously tested before being dispatched.

## LIGHTWEIGHT ALUMINIUM CONSTRUCTION

As weight on a fire appliance is a premium, our reels are manufactured in aluminium and then hard powder coated in the colour of your choice. This makes the reels the lightest and strongest possible.

## COMPLETE GUARDING SYSTEM

The reels are completely guarded, making them one of the safest hose reels on the market. Each reel fully complies with AS4024 and ISO12100-1:2003.

## MANUAL TO REMOTE REWIND UPGRADEABLE AT ANY TIME

The series starts with a high quality manual hose reel and with three basic steps can be upgraded to offer the benefits of powered, powered self-guided hose feed or fully remote control retractable.

## MULTIPLE REWIND POWER OPTIONS

The powered hose reels are available with 12 or 24 Volt High Torque, Low Rev electric motors that are hard wired to the vehicle battery. Units can also be hydraulically powered if required.

## ASSISTED REWIND = LESS FATIGUE

Our powered options enable rapid response in times of urgency as well as less fatigue associated with handling long or heavy lengths of hose.

## HUGE VARIETY OF HOSE OPTIONS

Quik Corp® reels are designed to take a wide variety of hose sizes and lengths. In fact we have a reel to suit almost any hose combination. Give us a call to see what we can do for you.

## HIGH GRADE HOSE REEL SWIVEL

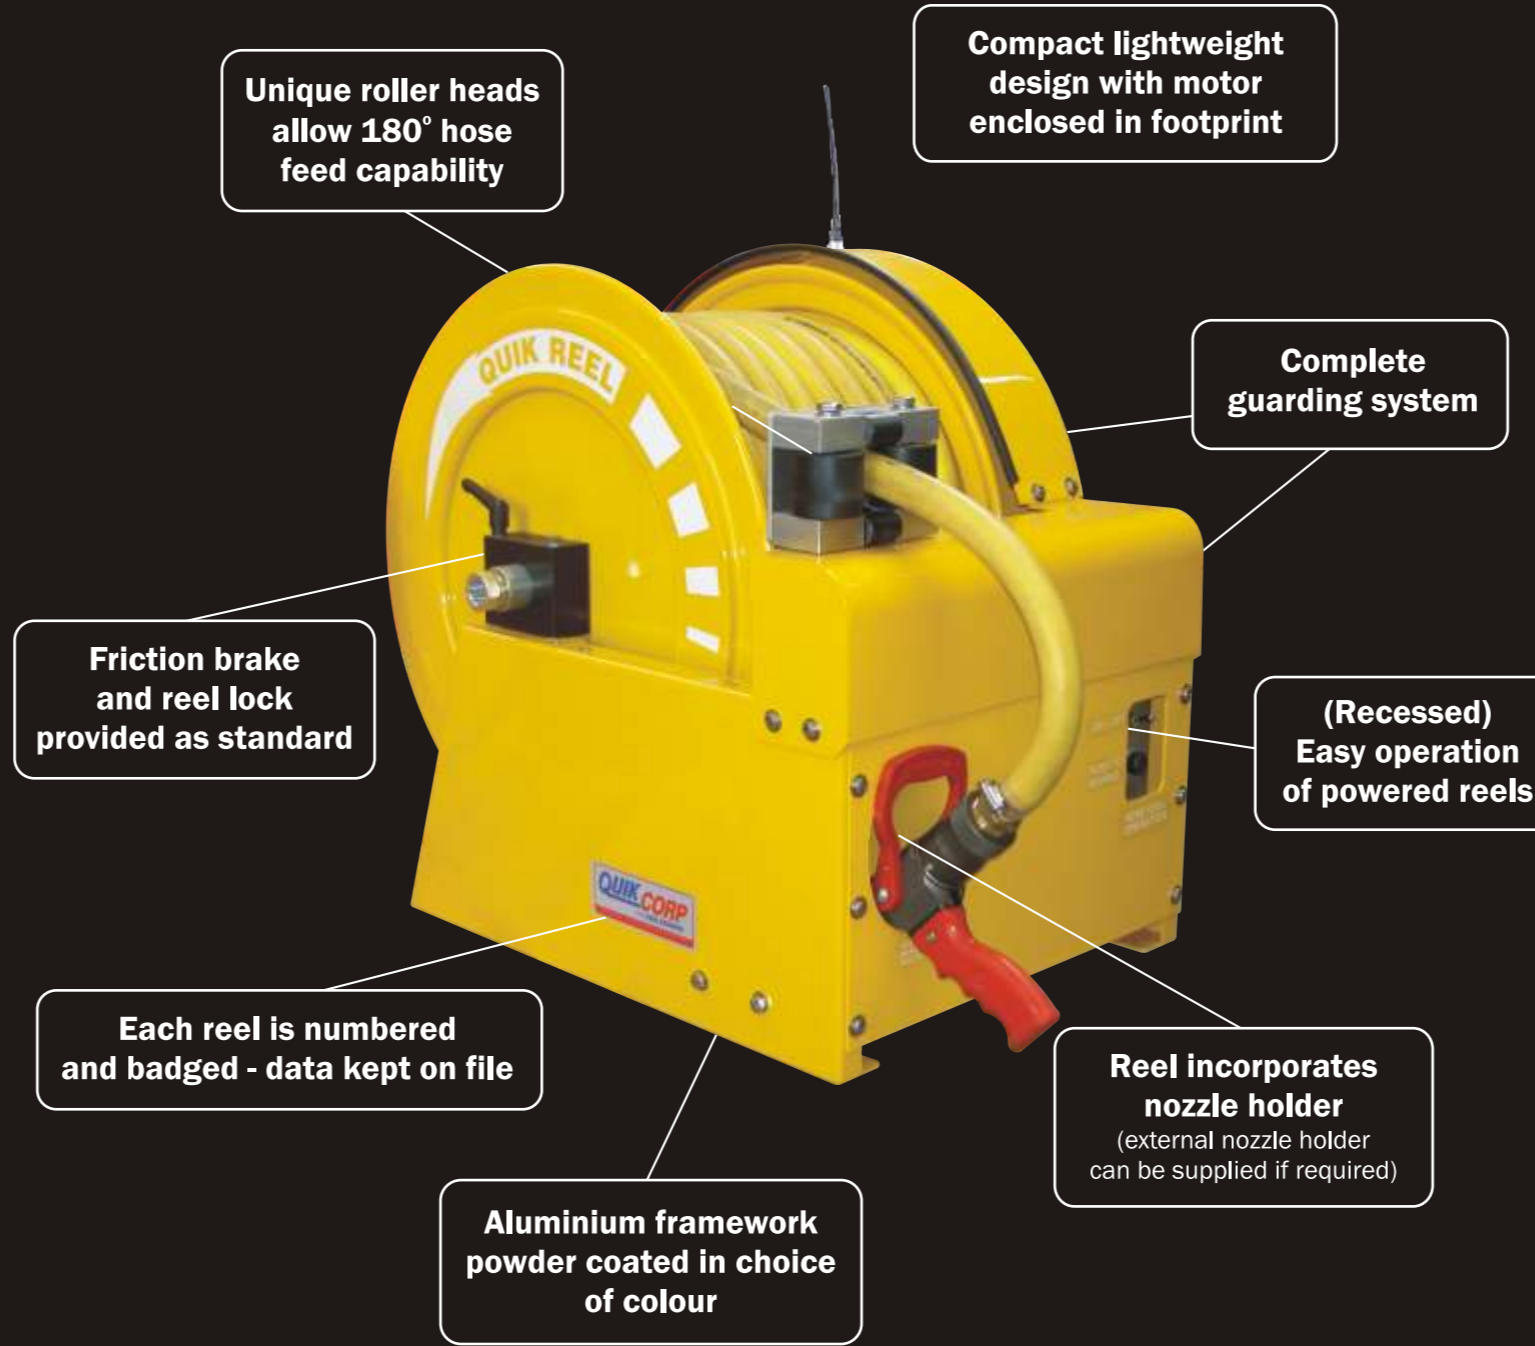

Safe working pressure rated up to 3000psi.

## MANUAL OVERRIDE HANDLE

All powered hose reels are fitted with a manual handle as a back up system. Handles are easily stowed on the unit via a locking fixture. Quik Corp® also provides a range of options for assisted manual rewind. These included bevel driven systems and 3-1 reduction drives. All of which means you will get the hose on the reel the easiest way possible.

## PATENTED AUSTRALIAN DESIGN

Aust Patent 627976, NZ Patent 239868, Aust Patent A-N (Multi-Pump) 2006905253, NZ Patent A-N (Multi-Pump) 561865
